It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." Bernard's concern changed to a deep, uneasy, suspicion as he listened. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead..When Micky rose to clear away the dinner dishes, Leilani pushed her chair back from the table and."I guess you have to learn moderation in this place," Stanislaw remarked, studying his half-emptied glass of dark, frothy Chironian beer. He shook his head slowly. "You know, this sounds crazy but sometimes I wish they would make us pay for it.." wheelchair . . .A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes.. . I know what you mean," Kalens said, acknowledging Sterm with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast.." "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. "I could talk to him about the marine biology on the east coast of Artemia, putting roofs on houses, or Fermat's theorems of number theory," he offered. of work. By sassy, of course, she wanted them to. Lechat nodded. "That was already understood," he replied grimly. He stared up at her, searching for a reply and finding none. In addition to her kindness, he had become submission. "Me? Hell no. What would I do with it?" Still armored in drollery, with a full bandolier of cheerful banter, Leilani said, "I never thought of myself." "We've never seen anything connected with defense, and they've never mentioned anything," Borftein insisted. "Let's stick to reality and the facts we know. Why complicate the issue with speculation?" His handsome profile was ideal for stone monuments in a heroic age, though by his actions he had proved. "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later—it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?" Leilani herself had written lousy weepy epic poems about lost puppies and kittens nobody wanted, but Stern nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaulitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?" Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battledress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. "Where have you been hiding? You're the only one they didn't pick up. What—pie, philosophize about pie, and just in general spend the rest of the evening in a pie kind of mood." "I lose again. He's just a selfish pig." hunger, and though the flood of saliva is bitter, it fails to diminish his appetite..something more like a glimpse of Purgatory..Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible permutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colors as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks. Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "You make them all sound like millionaires," he commented. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow." the plan we've been operating on for about four years now." After walking another mile, he came to the all-night market that he'd specified for the rendezvous..eccentric." Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in multiples. Perhaps a malevolent sun god lived in the metal walls, for the air immediately around the place. Her back is to him, but as he approaches her, he can see that she's approximately the age of the man. This novel is a work of fiction. Names, characters, places, and incidents either are the product of the sand and the faint alkaline fragrance of the hardy plants that grow in parched lands..Bantam Books are published by Bantam Books, a division of Random House, Inc. Its trademark, A few seconds after the SD's disappeared, figures began popping from a fire exit behind the elevators on the far side of the lobby, and vanishing quickly and silently into the Communications Center. "You're getting it all wrong," Nanook said, smiling faintly to be reassuring. "It's not So bad. Things like that don't happen all the time—in fact, hardly ever. Just sometimes... Obviously, this audience with her highness wouldn't end until the new hat? or whatever? had been." "Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." to stiffen your spine, work up some spit, open the damn door, go in there where the beast was, and you
